

Top Hat

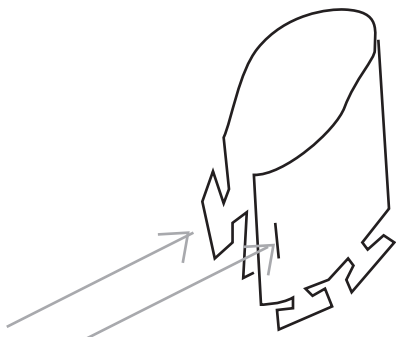

1. Trace three templates onto wallpaper sample paper and cut out.

2. You should end up with a round base, the top and side of hat.

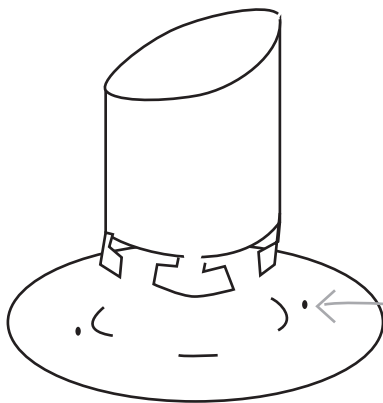

Materials: scissors, tape, glue, elastic, wallpaper sample paper and decorative elements (ribbon, buttons, etc.), glue gun (optional)

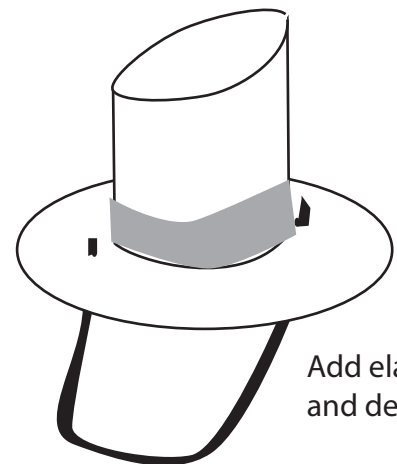

3. Roll the side form and tuck the tab into the slot on the side. Do this by folding the ends of the tabs toward the middle of the tab. This way it will fit through the slot. Once through the slot, unfold the tabs.

4. Attach the top to the rolled form by tucking the long tabs into the slots. Tape tabs from inside.

5. On the tube form, fold tabs to narrow them and tuck these into the slots on the base. Unfold fold tabs flat on underside of hat and tape. Snip a small diamond shape on either side of the base. The elastic strap will go through here.

Add elastic and details.
